INTERNATIONAL JOURNAL OF PRODUCTION RESEARCH

CONTENTS

Volume 37, 1999

International Journal of Production Research

Editor
John E. Middle, MSc, CEng
Department of Manufacturing Engineering
Loughborough University
Leicestershire LE11 3TU, UK

Reviews Editor
Robert I. M. Young, PhD
Department of Manufacturing Engineering
Loughborough University
Leicestershire LE11 3TU, UK

e-mail: IJPR@lboro.ac.uk

Editorial Board

Australia:	Professor E. J. Anderson, University of New South Wales
	Dr B. Jenney, Monash University
Belgium:	Professor L. F. Gelders, Centre for Industrial Management, Leuven
Canada:	Professor G. Abdulnour, Université du Quebec à Trois Rivières
France:	Professor F. B. Vernadat, Laboratoire de Genie Industriel et de Production Mecanique
Finland:	Professor H. E. Andersin, Helsinki University of Technology
Germany:	Professor Dr-Ing H. Bullinger, Fraunhofer-IAO, Stuttgart
	Professor H. Dyckhoff, RWTH Aachen
India:	Dr S. Sahu, Indian Institute of Technology, Kharagpur
Israel:	Professor E. Dar-El, Technion-Israel Institute of Technology, Haifa
	Professor D. Sipper, Tel Aviv University
Italy:	Professor U. Bertele, Politecnico di Milano, Milano
Japan:	Professor M. Yamamoto, Hosei University, Tokyo
	Professor H. Yamashina, Kyoto University, Kyoto
The Netherlands:	Professor Dr J. W. Bertrand, Technische Universiteit Eindhoven, Eindhoven
	Dr E. M. Goldratt, Dijkstraat, VG Roelofarendsveen
Poland:	Professor Jan Weglarz, Poznan University of Technology
PR China:	Professor W. S. Lau, Hong Kong Polytechnic University
	Professor S. C. Wang, Beijing University of Aeronautics and Astronautics, Beijing
Singapore:	Professor L. Lim, Nanyang Technological University
South Africa:	Professor R. Reinecke, University of Stellenbosch
South Korea:	Dr H. Hwang, Korea Advanced Institute of Science and Technology
Sweden:	Professor R. W. Grubbström
United Kingdom:	Professor C. B. Besant, Imperial College of Science and Technology, London
	Professor M. Brady, University of Oxford, Oxford
	Professor K. Case, Loughborough University
	Professor R. H. Hollier, UMIST
	Professor J. E. L. Simmons, Heriot-Watt University, Edinburgh
USA:	Professor J. F. Bard, The University of Texas at Austin
	Professor W. L. Berry, Ohio State University
	Dr T.-C. Chang, Purdue University
	Dr P. Dewhurst, University of Rhode Island
	Professor E. A. Elsayed, Rutgers State University
	Professor S. R. T. Kumara, The Pennsylvania State University
	Professor S. A. Melnyk, Michigan State University
	Professor D. C. Montgomery, Arizona State University
	Professor D. C. Whybark, University of North Carolina
	Dr D. L. Woodruff, The University of California at Davis
Founding Editor:	Professor N. A. Dudley, Emeritus Professor, University of Birmingham, UK

Subscription Information

International Journal of Production Research is published monthly except semi-monthly in January, March, May, July, September and November (total 18 issues) by Taylor & Francis Ltd, 11 New Fetter Lane, London EC4P 4EE, UK. Tel: +44 (0)171 842 2353. Fax: +44 (0)171 842 2373.

Annual Institutional Subscription, Volume 38, 2000

Print ISSN 0020-7543 $2530 £1534

A subscription to the print edition includes free access for any number of concurrent users across a local area network to the online edition, ISSN 1366-588X.

For more information, visit our website:
http://www.tandf.co.uk/E-pub/cwonline.htm

Print subscriptions only are also available to individual members of the Manufacturing Division of the Institution of Electrical Engineers, on application to the Institution.

Periodical postage paid at Jamaica, New York 11431, USA. US Postmasters: send address changes to *International Journal of Production Research*, Publications Expediting Inc., 200 Meacham Avenue, Elmont, New York 11003, USA. Air freight and mailing in the USA by Publications Expediting Inc.

Dollar rates apply to subscribers in all countries except the UK and the Republic of Ireland where the pound sterling price applies. All subscriptions are payable in advance and all rates include postage. Journals are sent by air to the USA, Canada, Mexico, India, Japan and Australasia. Subscriptions are entered on an annual basis, i.e. January to December. Payment may be made by sterling cheque, dollar cheque, international money order, National Giro, or credit card (Amex, Visa, Mastercard).

Orders originating in the following territories should be sent direct to the local distributor. **India:** Universal Subscriptions Agency Pvt. Ltd, 877 Phase V, Udyog Vihar, Gurgaon, 122001 India. **Japan:** Kinokuniya Co. Ltd, Journals Department, PO Box 55, Chitose, Tokyo 156, Japan. **USA/Canada:** Taylor & Francis, Inc., Journals Department, 47 Runway Road, Levittown, PA 19057, USA. Tel: +1 (215) 269 0400. Fax: +1 (215) 269 0363. **UK/Europe/Rest of World:** Taylor & Francis Ltd, Customer Services Department, Rankine Road, Basingstoke, Hampshire RG24 8PR, UK. Tel: +44 (0)1256 813 000. Fax: +44 (0)1256 330 245.

For a complete and up-to-date guide to Taylor & Francis Group's journals and books publishing programmes, and details on advertising in our journals, visit our web site:

International Journal of Production Research

Volume 37, 1999—CONTENTS

No. 1 10 January 1999

Global manufacturing: a review and a framework for planning in a global corporation. P. PONTRANDOLFO and O. G. OKOGBAA 1

Simultaneous versus sequential scheduling of multiple resources which constrain system throughput. J. V. SIMONS JR, M. D. STEPHENS and W. P. SIMPSON, III 21

An IDEF0 model-based intelligent fault diagnosis system for manufacturing systems. L. P. KHOO, C. L. ANG and J. ZHANG 35

Machining of free-form solids using an octree volume decomposition approach. Y.-J. TSENG and Y.-R. SUE 49

Optimal control of a job-shop production system with order-selection and switch-over. M. MATSUI, G. YANG and T. MIYA 73

Machining precision augmented by sensors. V. A. OSTAFIEV and A. DJORDJEVICH 91

An algebraic approach for dimensional chain identification in process planning. P. JI 99

Dispatching rail-guided vehicles and scheduling jobs in a flexible manufacturing system. J. LEE and R. MANEESAVET 111

A knowledge based system for optimum and concurrent design, and manufacture by powder metallurgy technology. L. N. SMITH and P. S. MIDHA 125

The partial information case for multivariate tolerance design using scrap or rework costs. H. MOSKOWITZ, R. PLANTE and J. DUFFY... 139

Optimum mean value and screening limits for production processes with multi-class screening. S. H. HONG, E. A. ELSAYED and M. K. LEE ... 155

An analysis of heuristics in a dynamic job shop with weighted tardiness objectives. E. KUTANOGLU and I. SABUNCUOGLU 165

Experimental analysis of dependent-variable manufacturing systems J. P. Shewchuk 189

Information management in production planning for a virtual enterprise. Q. ZHOU and C. B. BESANT 207

Minimizing makespan on a single batch processing machine with dynamic job arrivals. C.-Y. LEE and R. UZSOY 219

Technical note: Stochastic flowshop makespan simplifications. D. MIDDLETON 237

No. 2 20 January 1999

Analyzing organizational project alternatives for agile manufacturing processes: an analytical network approach. L. M. Meade and J. Sarkis 241

Efficient facility layout planning in a maximally planar graph model. E. Pesch, F. Glover, T. Bartsch, F. Salewski and I. Osman 263

Grouping efficiency measures in cellular manufacturing: a survey and critical review. B. R. Sarker and S. Mondal 285

A certification method for the milling process of free-form surfaces using a test part. F. Thiebaut, C. Lartigue and E. Duc 315

Scheduling project activities to maximize the net present value—the case of linear time-dependent cash flows. R. Etgar and A. Shtub 329

Concurrence, postponement and trans-shipment in a two-echelon manufacturing and distribution system. Z. K. Weng 341

A heuristic for solving manufacturing process and equipment selection problems. M. Chen 359

Empirical approximation of volume distance distributions for line layout problems. C. J. Malmborg 375

The economic design of an $\bar{X}$ control chart recognizing process improvement. E. A. Silver and T. R. Rohleder 393

Improved tool path generation, error measures and analysis for sculptured surface machining. R. Aekambaram and S. Raman 413

Robust design optimization for multiple characteristic problems. K.-L. Tsui 433

CATIP: A Computer-Aided Tactile Inspection Planning system. A. Limaiem and H. A. Elmaraghy 447

A methodology of implementation of cellular manufacturing. G. Da Silveira 467

No. 3 15 February 1999

Computer-Integrated Process Planning and Scheduling (CIPPS): intelligent support for product design, process planning and control. K. A. Aldakhilallah and R. Ramesh... 481

Fractal layout organization for job shop environments. B. Montreuil, U. Venkatadri and R. L. Rardin 501

The effects of partial order release and component reservation on inventory and customer service performance in an MRP environment. D. J. Bragg, E. A. Duplaga and C. A. Watts 523

ACCORD: a bicriterion algorithm for cell formation using ordinal and ratio-level data. G. Jayakrishnan Nair and T. T. Narendran 539

A genetic algorithms-based approach for design of manufacturing systems: an industrial application. H. A. Rao, S. N. Pham and P. Gu 557

Performance evaluation of a flow line system with Bernoulli sampling inspections. H.-S. Lee, Y. Frein and C. Duri 581

Buyer–supplier operational practices, sourcing policies and plant performances: results of an empirical research. A. De Toni and G. Nassimbeni 597

Experimental design in production and maintenance control problem of a single machine, single product manufacturing system. J. P. Kenne and A. Gharbi 621

Tool-wear effect compensation under sequential tolerance control. B. M. P. Fraticelli, E. A. Lehtihet and T. M. Cavalier 639

Routing automated guided vehicles in the presence of interruptions. R. Narasimhan, R. Batta and M. H. Karwan 653

An integrated approach for facility layout, P/D location and material handling system design. S. Chittratanawat and J. S. Noble 683

Manufacturing cells design with alternative process plans and/or replicate machines. S. Sofianopoulou 707

No. 4 10 March 1999

ULINO: Optimally balancing U-shaped JIT assembly lines. A. Scholl and R. Klein 721

Confirmation sample control charts. S. H. Steiner 737

Development and validation of genetic algorithm-based facility layout—a case study in the pharmaceutical industry. S. Hamamoto, Y. Yih and G. Salvendy 749

A workload balancing model for determining set-up time and batch size reductions in GT flow line workcells. R. R. Gung and H. J. Steudel 769

On determination of sample size in form error evaluation using coordinate metrology. V. N. Narayanan Namboothiri and M. S. Shunmugam 793

Automatic PLC software generator with a natural interface. O. Durán and A. Batocchio 805

Relating company performance to staff perceptions: the impact of concurrent engineering on time to market. V. G. Duffy and G. Salvendy 821

An economic machining process model using fuzzy non-linear programming and neural network. Y. H. Lee, B. H. Yang and K. S. Moon 835

The impact of new production technologies on the maintenance function: an empirical study. L. Swanson 849

Measuring the mix response flexibility of manufacturing systems. N. Bateman, D. J. Stockton and P. Lawrence 871

The effect of warehouse cross aisles on order picking efficiency. T. S. Vaughan and C. G. Petersen 881

Fuzzy outranking approach to prioritize design requirements in quality function deployment. J. Wang 899

Optimal tool replacement and resetting strategies in automated manufacturing systems. A. K. Sheikh, A. Raouf, U. A. Sekerdey and M. Younas 917

Manufacturing technology sourcing practices in the USA. T. S. Baines, D. E. Whitney and C. Fine 939

Book reviews 957

No. 5 20 March 1999

An empirical evaluation of holonic and fractal layouts. R. G. Askin, F. W. Ciarallo and N. H. Lundgren 961

The development and implementation of a simulation tool for the assessment of quality economics within a cell-based manufacturing company. H. J. Clark and J. D. T. Tannock 979

Due date demand management: negotiating the trade-off between price and delivery. D. R. Moodie and P. M. Bobrowski 997

Real-time operation and tool selection in single stage multimachine systems. P.-H. Koo and J. M. A. Tanchoco 1023

Cellular machine layout based on the Segmented Flow Topology. J. M. A. Tanchoco and A. C. Lee 1041

Operation sequencing in CAPP using genetic algorithms. S. V. Bhaskara Reddy, M. S. Shunmugam and T. T. Narendran 1063

Green QFD-II: a life cycle approach for environmentally conscious manufacturing by integrating LCA and LCC into QFD matrices. Y. Zhang, H.-P. Wang and C. Zhang 1075

An improved decomposition method for the analysis of production lines with unreliable machines and finite buffers. Y. Dallery and H. Le Bihan 1093

Some remarks on scatter plots generation procedures for facility layout. J. Grobelny 1119

Formulations and heuristics for scheduling in a Kanban flowshop to minimize the sum of weighted flowtime, weighted tardiness and weighted earliness of containers. C. Rajendran 1137

Axiomatic design of flexible manufacturing systems. B. Babic 1159

A design approach to the multi-objective facility layout problem. C.-W. Chen and D. Y. Sha 1175

Book review 1197

No. 6 15 April 1999

Obituary: Emeritus Professor Roy Sury CEng PhD (1924–1999), Principal Editor of *IJPR* (1980–1998) 1199

Optimal material release times in stochastic production environments. C. N. Hasan and M. L. Spearman 1201

Automatic visual inspection of surface mount solder joint defects. O. Oyeleye and E. A. Lehtihet 1217

An options view of robot performance parameters in a dynamic environment. M. J. Khouja and R. L. Kumar 1243

Automatic extraction of manufacturable features from CADD models using syntactic pattern recognition techniques. B. S. Prabhu and S. S. Pande 1259

Compliance based MIP model and heuristic for support layout optimization. Q. A. Sayeed and E. C. De Meter 1283

Machine loading and part type selection in flexible manufacturing systems. F. Guerrero, S. Lozano, T. Koltai and J. Larrañeta 1303

Document viewpoint on one-of-a-kind delivery process. A.-P. Hameri, J. Nihtilä and J. Rehn... 1319

Organizational factors and total quality management—an empirical study. I. Nelson Joseph, C. Rajendran, T. J. Kamalanabhan and R. N. Anantharaman 1337

A closed-loop process analysis and control system for machining parts. S. H. Cheraghi, X. Chen, J. M. Twomey and R. Arupathi 1353

Scheduling to minimize product design time using a genetic algorithm. F. S. C. Lam, B. C. Lin, C. Sriskandrarajah and H. Yan 1369

The construction of production performance prediction system for semiconductor manufacturing with artificial neural networks. C.-L. Huang, Y.-H. Huang, T.-Y. Chang, S.-H. Chang, C.-H. Chung, D.-T. Huang and R.-K. Li 1387

An empirical examination of quality tool deployment patterns and their impact on performance. R. Handfield, J. Jayaram and S. Ghosh ... 1403

Part dispatching and machine loading in flexible manufacturing systems using central queues. J. N. D. Gupta, L. H. S. Luong and V. H. Nguyen 1427

Book reviews 1437

No. 7 10 May 1999

Modelling architectures: a review of their application in structured methods for information systems specification. K. T. K. Toh 1439

Workload balancing in the manufacturing environment: a multicriteria trade-off analysis. M. Kuula, A. Stam, S. Leino, J. Ranta and J. Wallenius 1459

Efficient orderbatching methods in warehouses. M. B. M. de Koster, E. S. van der Poort and M. Wolters 1479

3D random stacking of weakly heterogeneous palletization problems. G. Abdou and M. Elmasry 1505

Some simple, but efficient, push and pull heuristics for production sequencing for certain flexible manufacturing systems. A. THESEN 1525

Job shop scheduling considering material handling. J. S. SMITH, B. A. PETERS and A. SRINIVASAN 1541

Alternative tolerance allocations for machining parts represented with multiple sets of features. Y.-J. TSENG and Y.-S. TERNG 1561

A two-stage neural network approach for process variance change detection and classification. S. I. CHANG and E. S. HO 1581

Design of negotiation protocols for multi-agent manufacturing systems. N. K. C. KROTHAPALLI and A. V. DESHMUKH 1601

Effective nesting of rectangular parts in multiple rectangular sheets using genetic and heuristic algorithms. A. RAMESH BABU and N. RAMESH BABU 1625

A DSS approach to developing systems to support production planning and control in smaller companies. D. N. HALSALL and D. H. R. PRICE ... 1645

Scheduling with shutdowns and sequence dependent set-up times. M. ASANO and H. OHTA 1661

Book reviews 1677

No. 8 20 May 1999

Sculptured surface reconstruction from CMM measurement data by a software iterative approach. Y. M. CHANG and F. L. CHEN 1679

Job shop scheduling with a non-regular objective: a comparison of neighbourhood structures based on a sequencing/timing decomposition. P. BRANDIMARTE and M. MAIOCCO 1697

Data reduction techniques and hypothesis testing for analysis of benchmarking data. J. A. NICKERSON and T. W. SLOAN 1717

Recognition of control chart concurrent patterns using a neural network approach. R.-S. GUH and J. D. T. TANNOCK 1743

Achieving manufacturing business integration through the combined formalisms of CIMOSA and Petri nets. M. W. C. AGUIAR and J. M. EDWARDS 1767

A competitive branch-and-bound algorithm for the simple assembly line balancing problem. A. SPRECHER 1787

Towards automatic generation of plans for automated assembly. Z. KUNICA and B. VRANJES 1817

Functional flexibility and team performance. E. MOLLEMAN and J. SLOMP 1837

A new model for the strategic management of inventories subject to peaks in market demand. A. BRANDOLESE and R. CIGOLINI 1859

An integrated neural network approach for simultaneous monitoring of process mean and variance shifts—a comparative study. E. S. HO and S. I. CHANG 1881

A new approach to finite scheduling. E. SHAYAN and H. FALLAH 1903

Book reviews 1916

No. 9 15 June 1999

A comparison of mean reduction versus variance reduction in processing times in flow shops. G. D. TAYLOR and S. S. HERAGU 1919

Using neural networks for 3D measurement in stereo vision inspection systems. F.-C. TIEN and C. A. CHANG 1935

Robust tolerance design by computer experiment. A. JEANG and E. LEU 1949

The role of designer–buyer–supplier in the maquiladora industry. S. DOWLATSHAHI and N. CONTRERAS 1963

Auto-bias selection for developing learning-based scheduling systems. C.-C. CHEN, Y. YIH and Y.-C. WU 1987

Dynamic conflict-free routing of automated guided vehicles. C. OBOTH, R. BATTA and M. KARWAN 2003

Improving performance using workforce flexibility in an assembly environment with learning and forgetting effects. J. K. MCCREERY and L. J. KRAJEWSKI 2031

Life cycle cost model for acquisition of automated systems. N. M. DE VASCONCELLOS JR and M. YOSHIMURA 2059

Manufacturing priorities: do general managers and manufacturing managers agree? R. KATHURIA, S. J. PORTH and M. P. JOSHI 2077

A paradigm for ERP and BPR integration. J. K. C. NG, W. H. IP and T. C. LEE 2093

Use of activity-based costing and economic value analysis for the justification of capital investments in automated material handling systems. G. IOANNOU and W. G. SULLIVAN 2109

Stochastic coloured Petri net (SCPN) models of traditional and flexible kanban systems. K. E. MOORE and S. M. GUPTA 2135

No. 10 10 July 1999

MetaMorph: an adaptive agent-based architecture for intelligent manufacturing. F. MATURANA, W. SHEN and D. H. NORRIE 2159

Dynamic dispatching rule-pairs for multitasking workers in JIT production systems. J. K. COCHRAN and H.-C. HORNG 2175

The determination of mean and/or variance shifts with artificial neural networks. İ. DEDEAKAYOĞULLARI and N. BURNAK 2191

An instrument for measuring total quality management implementation in manufacturing-based business units in India. I. N. JOSEPH, C. RAJENDRAN and T. J. KAMALANABHAN 2201

Design and operation of single-loop dual-rail inter-bay material handling system. M.-T. (MARK) CHEN, L. MCGINNIS and C. ZHOU 2217

Modelling material separation processes in bulk recycling. M. S. SODHI, J. YOUNG and W. A. KNIGHT 2239

The impact of sequencing decisions on multi-item lot sizing and scheduling in flow shops. J. OUENNICHE, F. F. BOCTOR and A. MARTEL 2253

The use and effectiveness of modern manufacturing practices: a survey of UK industry. P. E. WATERSON, C. W. CLEGG, R. BOLDEN, K. PEPPER, P. B. WARR and T. D. WALL... 2271

Reacting JIT ordering systems to the unstable changes in demand. K. TAKAHASHI and N. NAKAMURA 2293

Fuzzy inference-based multiple criteria FMS scheduling. L. YU, H. M. SHIH and T. SEKIGUCHI 2315

Modelling level and demand changes in manufacturing systems. A. DAVIES and J. H. WILLIAMS 2335

Object-oriented analysis and design of a manufacturing feature representation. A. CHEP and L. TRICARICO 2349

Jointly solving the group scheduling and machining speed selection problems: a hybrid tabu search and simulated annealing approach. S. ZOLFAGHARI and M. LIANG... 2377

Book review 2398

No. 11 20 July 1999

Manufacturing responsiveness through integrated process planning and scheduling. N. N. GINDY, S. M. SAAD and Y. YUE 2399

Scheduling a workforce under annualized hours. R. HUNG... 2419

Facility layout design in a changing environment. J. S. KOCHHAR and S. S. HERAGU 2429

Mixing macro and micro flowtime estimation model: wafer fab example. T.-Y. TSENG, T.-F. HO and R.-K. LI 2447

The optimal production and shipment policy for the single-vendor single-buyer integrated production-inventory problem. R. M. HILL 2463

A complete tolerance charting system in assembly. B. K. A. NGOI and J. M. ONG 2477

Rating the importance of customer needs in quality function deployment by fuzzy and entropy methods. L. K. CHAN, H. P. KAO, A. NG and M. L. WU 2499

A feature recognition methodology for extrudable product shapes. S. KUMAR, K. SHANKER and G. K. LAL 2519

Some design issues in cellular manufacturing using the fuzzy programming approach. R. SHANKER and P. VRAT 2545

An integrated intelligent approach to process diagnosis in process industries. J. JIAO, W. ZHANG, Z. ZHAO and J. CHA 2565

Modelling and optimization of industrial manufacturing processes subject to *no-wait* constraints. R. MACCHIAROLI, S. MOLÈ and S. RIEMMA 2585
Algorithms for production flow analysis. S. T. S. DAITA, S. A. IRANI and S. KOTAMRAJU 2609

No. 12 15 August 1999

A generative system for re-engineering manufacturing system organization. J. MACEDO 2639
Component commonality in a multiple-period inventory model with service level constraints. M. S. HILLIER 2665
Reduced simulation models of wafer fabrication facilities. Y.-F. HUNG and R. C. LEACHMAN 2685
Probabilistic sequential methodology for designing a factorial system with multiple responses. I. BEN-GAL, D. BRAHA and O. Z. MAIMON 2703
Scheduling in a production environment with multiple process plans per job. K.-H. KIM and P. J. EGBELU 2725
Automatic generation of dynamic clamping forces for machining fixtures. Z. J. TAO, A. SENTHIL KUMAR and A. Y. C. NEE 2755
Information modelling: an integration of views of a manufacturing enterprise. J. A. HARDING, B. YU and K. POPPLEWELL 2777
Sequence-dependent clustering of parts and machines: a Fuzzy ART neural network approach. N. C. SURESH, J. SLOMP and S. KAPARTHI 2793
Scheduling in the dynamic job shop under auxiliary resource constraints: a simulation study. V. B. GARGEYA and R. H. DEANE 2817
Balancing and sequencing manual mixed-model assembly lines. C. MERENGO, F. NAVA and A. POZZETTI 2835
Comparative analysis of order-input sequencing heuristics in a cellular flexible assembly system for large products. B.-Y. LEU... 2861
Book reviews 2874

No. 13 10 September 1999

An object-oriented application of tool selection in dynamic process planning. J. M. USHER and K. J. FERNANDES 2879
Facility layout of irregular-shaped departments using a nested approach. A. R. MCKENDALL JR, J. S. NOBLE and C. M. KLEIN 2895
Carryover effects in multi-attribute inspection. R H. YEH, S.-T. TSENG and W.-T. HO 2915

A decision model for evaluation of flexible manufacturing systems in the presence of both cardinal and ordinal factors. J. SARKIS and S. TALLURI 2927

Reducing total tardiness cost in manufacturing cell scheduling by a multi-factor priority rule. S.-J. (GARY) CHEN and L. LIN 2939

Engineering design management: an information structure approach. A. YASSINE, D. FALKENBURG and K. CHELST 2957

MPS with multiple freeze fences in multi-product multi-level MRP systems. J. H. Y. YEUNG, W. C. K. WONG, L. MA and J. S. LAW 2977

Fixturing surface accessibility analysis for automated fixture design. J. LI, W. MA and Y. RONG 2997

A set of generic flexibility measures for manufacturing applications. J. P. SHEWCHUK 3017

Order release and deadlock avoidance interactions in counter-flow system optimization. M. LAWLEY and J. MITTENTHAL 3043

Feature patterns in recognizing non-interacting and interacting primitive, circular and slanting features using a neural network. A. H. ZULKIFLI and S. MEERAN 3063

A neural network approach for batching decisions in wafer fabrication. C. S. SUNG and Y. I. CHOUNG 3101

Book reviews 3115

No. 14 20 September 1999

A comparison of cellular manufacturing research presumptions with practice. R. F. MARSH, S. M. SHAFER and J. R. MEREDITH 3119

Developing a Petri-net-based simulation model for a modified hierarchical shop floor control framework. C. OU-YANG and C. M. SHIEH 3139

Robust design of asynchronous flexible assembly systems. A. A. BULGAK, Y. TARAKCI and V. VERTER 3169

Methods for the sequencing of sheet metal bending operations. J. R. DUFLOU, D. VAN OUDHEUSDEN, J.-P. KRUTH and D. CATTRYSSE 3185

A multiple-criteria decision methodology for the make-or-buy problem. J. M. PADILLO and M. DIABY 3203

The impact of ignored attributes on a CMS design. F. CHOOBINEH and A. NARE 3231

A matching pursuit approach to small drill bit breakage prediction. J. C. FU, C. A. TROY and P. J. PHILLIPS 3247

Part-family formation for cellular manufacturing: a case study at Harnischfeger. H. SEIFODDINI and B. TJAHJANA 3263

Optimal tolerance design by response surface methodology. A. JEANG ... 3275

Cell design and loading in the presence of alternative routing. S. LOZANO, F. GUERRERO, I. EGUIA and L. ONIEVA 3289

General heuristic procedures and solution strategies for FMS scheduling. J. LIU AND B. L. MACCARTHY 3305

Soft-computing-based approaches to the group technology problem: a state-of-the-art review. V. VENUGOPAL 3335

No. 15 15 October 1999

An optimization approach to capacity expansion in semiconductor manufacturing facilities. J. F. BARD, K. SRINIVASAN and D. TIRUPATI 3359

Enactment of IDEF0 models. ANG C.-L. 3383

Towards the integration of flexible manufacturing system scheduling. O. O. BALOGUN and K. POPPLEWELL 3399

Cutter path preview for contour machining based on efficient identification of motion error sources. C.-C. LO 3429

Evaluation of manufacturing cell loading rules for independent cells. G. A. SÜER, M. SAIZ and W. GONZÁLEZ 3445

Cooperation schemes for heterogeneous material-handling vehicle fleets. D. SINRIECH and O. SHECHTER 3469

A computational geometry approach to optimum clamping synthesis of machining fixtures. Z. J. TAO, A. S. KUMAR and A. Y. C. NEE 3495

An efficient heuristic for the design of cellular manufacturing systems with multiple identical machines. N. WU and G. SALVENDY 3519

Three-step precise robotic peg–hole insertion operation with symmetric regular polyhedral objects. H. QIAO and S. K. TSO 3541

Determination of unit load sizes of AGV in multi-product multi-line assembly production systems. S. W. MOON and H. HWANG 3565

A batch splitting method for a job shop scheduling problem in an MRP environment. H.-I. JEONG, J. PARK and R. C. LEACHMAN 3583

No. 16 10 November 1999

Aligning marketing and manufacturing strategies with the market. W. L. BERRY, T. HILL and J. E. KLOMPMAKER 3599

Production scheduling across multi-machine packaging lines for the pre-scheduling level. P. VAN DAM, G. J. C. GAALMAN and G. SIERKSMA ... 3619

Concepts of neighbourhood and universal compact yield towards achieving best pattern layouts. S. K. CHENG and K. P. RAO 3643

Tool path generation for five-axis machining of impellers. S. PARK, M. CHANG and J. H. JU 3659

A process modelling framework for AGV control. S. Basu, S. P. Dutta and W. P. T. North 3671
Selection of an optimal subset of sizes. S. Jorjani, C. H. Scott and D. L. Woodruff 3697
Job-shop scheduling—using component packing and simulated annealing approach. M. F. Hussain and S. B. Joshi 3711
Maintenance policy selection for JIT production systems. F. Azadivar and V. Shu 3725
An iterative facility layout algorithm. K.-Y. Gau and R. D. Meller ... 3739
A hierarchical planning approach for a production-distribution system. L. Özdamar and T. Yazgaç 3759
An implicit enumeration approach to probabilistic tolerance allocation under conventional tolerance control. D. L. Wheeler, T. M. Cavalier and E. A. Lehtihet 3773
Control chart for linguistic variables: a method based on the use of linguistic quantifiers. F. Franceschini and D. Romano... 3791
Application of tabu search to process plan optimization for four-axis CNC turning centres. D. Veeramani, A. H. Stinnes and D. Sanghi 3803
A bi-directional scheduling approach for job shops. D. C. Bushée and J. A. Svestka 3823
Book review 3838

No. 17 20 November 1999

IDEF*: a comprehensive modelling methodology for the development of manufacturing enterprise systems. C.-L. Ang, K. L. Pheng and G. R. K. Leng 3839
An overview of design and operational issues of kanban systems. M. S. Akturk and F. Erhun 3859
Evaluation of alternative tolerance allocations for multiple machining sequences with geometric tolerances. Y.-J. Tseng and H.-W. Kung 3883
Log-linear and non-log-linear learning curve models for production research and cost estimation. T. L. Smunt 3901
Workshop scheduling using practical (inaccurate) data—Part 1: The performance of heuristic scheduling rules in a dynamic job shop environment using a rolling time horizon approach. R. Shafaei and P. Brunn... ... 3913
Maintenance integration in manufacturing systems by using stochastic Petri nets. Z. Simeu-Abazi and C. Sassine 3927
Virtual facility layout design: the value of an interactive three-dimensional representation. R. P. Smith and J. A. Heim 3941
Assessment of circularity error using a selective data partition approach. K. Rajagopal and S. Anand 3959

Automated process planning for parametric parts. H. ROZENFELD and H. T. KERRY JR 3981
Statistical tolerance synthesis using distribution function zones. C. ZHANG, J. LUO and B. WANG 3995
Applications of neural networks to solving SMT scheduling problems—a case study. M. CHEN and Y. DONG 4007
A quantitative analysis of the factors affecting personnel capacity requirement in maintenance department. H. LUCZAK and E. MJEMA 4021
A finite-element model with closed-form solutions to workpiece deflections in turning. A.-V. PHAN, G. CLOUTIER and J. R. R. MAYER... 4039
AGV dispatching based on workload balancing. C. W. KIM, J. M. A. TANCHOCO and P.-H. KOO 4053
A note on 'deliberately slowing down output in a family production context'. M. KHOUJA 4067

No. 18 15 December 1999

An enterprise modelling CASE tool and data schema requirements for the selection of software support. K. T. K. TOH and J. A. HARDING 4079
Workshop scheduling using practical (inaccurate) data—Part 2: An investigation of the robustness of scheduling rules in a dynamic and stochastic environment. R. SHAFAEI and P. BRUNN 4105
Early supplier involvement: theory versus practice. S. DOWLATSHAHI ... 4119
A statistical approach to real-time quality control. H. WIKLUND 4141
Evaluating and selecting investments in industrial robots. M. BRAGLIA and A. PETRONI 4157
Object oriented manufacturing resource modelling for adaptive process planning. Y. ZHANG, S. C. FENG, X. WANG, W. TIAN and R. WU 4179
Performance estimation models for AS/RS with unequal sized cells. Y. H. LEE, J. M. A. TANCHOCO and S. J. CHUN 4197
Predictable scheduling of a single machine with breakdowns and sensitive jobs. R. O'DONOVAN, R. UZSOY and K. N. MCKAY 4217
Profit margin, process improvement and capacity decisions in global manufacturing. A. K. CHAKRAVARTY 4235
A tabu thresholding implementation for the irregular stock cutting problem. J. A. BENNELL and K. A. DOWSLAND 4259
Announcement 4277
Referees List 4279
Index of Authors 4289
